- Adult patient with AD of the hands
- Adult patient with diffused AD over a larger body area

☐ **A Review of
2 Pediatric Cases**

- Pediatric patient with AD on the neck and folds
- Pediatric patient with AD on the back and buttocks

☐ **A Review of 1 Adult
and 1 Pediatric Case**

- Pediatric patient with AD on the back and buttocks
- Adult patient with diffused AD over a larger body area

Scientific Committee:

Dr. Sam Hanna

Dermatologist, Ontario

Dr. Jennifer Salsberg

Dermatologist, Ontario

Dr. Jordana Schachter

Dermatologist, Quebec

Dr. Marni Wiseman

Dermatologist, Manitoba

Learning Objectives:

At the conclusion of this program, participants will be able to:

- Understand the Canadian recommendations on the management of mild to moderate Atopic Dermatitis (AD) and how they can be incorporated into clinical practice
- Review the efficacy and safety profile for the topical treatments for AD
- Address the chronicity of AD and optimize treatment duration to improve long-term patient outcomes
- Create a personalized long-term plan of action for patients based on an appropriate choice of topical treatments for AD and including triggers for referral
