

Evolving COVID-19 Outpatient Therapies

INVITATION

This program will discuss strategies to manage COVID-19 in the outpatient setting through the effective use of antivirals and monoclonal antibodies.

LEARNING OBJECTIVES

Upon completion of this activity, participants will be able to:

1. Explain the COVID-19 landscape and disease burden in Canada
2. Explain the mechanism of action, efficacy and safety of outpatient therapies
3. Apply national and provincial guidelines for the treatment of COVID-19 outpatients
4. Identify patients eligible for outpatient therapies based on risk stratification
5. Describe the role of primary care in the treatment of COVID-19 outpatients
