

# Research Participants Needed

## Survey on Reporting Structures for Hospital-Based Nurse Practitioners in Canada

### What is it about?

This study will identify and examine reporting structures for hospital-based nurse practitioners (NPs) in Canada and how they impact role implementation, job satisfaction, and intention-to-stay.

### What does it involve?

Complete a 20-minute online survey

### Who can participate?

- Licensed NPs in Canada
- Working in an inpatient or outpatient setting in any type of hospital (i.e., general medical/surgical, specialty, complex continuing care, rehabilitative care)
- Fluent in French or English
